ACTISOFT
TECHNOLOGY LIMITED

Volunteers required

Looking for 2 businesses to volunteer for a heavily discounted Silver IT Security Assessment. List price is £550 and the offer to you is £275

We would like one business to have their main systems on-premise with 20+ end users.

We would like the other one to be running the majority of their systems in the cloud again with 20+ end users.

The assessment is non-evasive and does not disrupt working time. The assessment collects data that is taken away to generate the extensive range of reports and to review. NDA's can be provided if required.

There is also an assessment form to go through onsite to include a walkaround and discuss security.

The assessment takes approximately half a day information gathering and another half day, or less, to review the results.

Reports include;

Management Plan, Security Risk Report, Security Management Plan, Computer Security Report, Security PowerPoint, Anomalous Login Report, External Vulnerabilities Scan Report, Security Policy Assessment Report, Data Breach Liability Report + more

Reports are dependent upon your system set up. Not all reports may be available.
